HEAD OFFICE AT HEILOO (HOLLAND)

GIFT TOKENS

Bulbs make a very suitable present where other articles fail. We supply Gift Tokens to any value desired and they are in the form of an attractive card to enable recipients to select Bulbs from our Catalog to the specified value.

On receipt of remittance at our Chicago Office the Token can be sent direct to the recipient together with a copy of our current Catalog, if so required.

Heiloo (Holland) April 1950

The presentation of our 1950 bulb catalog goes with our greetings and best thanks to our many loyal Friends and Customers, old and new, in the U.S.A. for their past favors and also for the many indications of welcome to our Mr. Peter de Jager on the occasion of opening his office in Chicago early this year.

We are glad to be able to report that, at this time of writing, our stocks look very promising for the new season and seem all the better for the mild winter that we experienced in this country.

In this catalog we have again added to the list of New Daffodils and Tulips all of magic beauty and we hope they will be greeted with appetizing expectations to further the beauty of your Homes and Gardens and entering on the exhibition table at your Daffodil and Tulip Shows.

All orders and payments should be sent to our Chicago Office, addressed as follows:

*P. de Jager & Sons Co. Inc.,
3303 West Lawrence Avenue,
Chicago 25, Illinois.*

As in the past the selection of High Quality Bulbs, the packing and executing of orders, will be done with utmost care at our Nurseries in Heiloo (Holland) and just as soon as they are ready to travel safely they will go forward to you in solid packing material. Our long experience holds a guarantee of satisfactory handling of your order, in this we feel to have a definite obligation.

A limited stock of a few of the best and most popular kinds of bulbs will be carried in Chicago to fill urgent and perhaps a few late orders. A list of available varieties will be forwarded on request.

In conclusion we again appeal to all American Gardeners to send their orders early as so much time goes into the preparation of an order. We venture to ask you also to tell your friends of this easy way of obtaining High Quality Bulbs of top No. 1 size delivered free to their door steps from an old House of Holland Bulb Growers. The cultivation of these bulbs adds so much to the attitude of a real gardener, kindness, patience and tolerance, just stop and think of these good things in the turbulent world of to-day.

Business Terms and General Directions to Customers

Free delivery to all points in the United States for all prepaid orders over \$ 10.00. Smaller orders please add \$ 1.00 for extra postage and packing.

We pay Importation Duties and all Transportation charges and guarantee the safe arrival of your Bulbs for which we prepare the necessary documents and make no charges for cases or packing.

For Canada add 10% to prices to defray extra costs of importation-duties.

Insurance. The bulbs are insured during transit at our expense and the insurance includes theft, missing, war-risk, heating and freezing.

Our Guarantee. As all other Leading American Importers we disclaim responsibility as to the flowering results and crop, but we guarantee our bulbs to be perfectly true to name and to be of the finest and best quality the year produces. All bulbs offered in this list are thoroughly examined for their density and soundness before leaving our nurseries and subsequently certified by an authorized official of the Dutch Government Phytopathological Service Department.

All orders to be sent to our Chicago Office: P. de Jager & Sons Co. Inc., 3303 West Lawrence Ave., Chicago 25, Ill. Phone: Independence 3-8347. Telegrams: Dejaco, Chicago.

PAYMENTS. Unless otherwise arranged our terms are cash with order please, and all checks, money orders etc. should be made payable to P. de Jager & Sons Co. Inc., Chicago. No C.O.D.

To protect the interests of our customers our Chicago Office will hold all money paid to them in advance until the bulbs have arrived at destination.

Discount for larger orders. We allow a special discount of 5% on orders amounting over \$ 100.—; 7½% on orders over \$ 200.—; and 10% on orders amounting \$ 300.— and over. These discounts are also allowed on Collective or Group orders from Garden Clubs, Horticultural Societies, Institutes etc.

Price Calculation. Not less than 6 of one variety will be charged at the price per dozen; 50 at the price per 100 and 250 at the price per 1000.

Early orders are earnestly requested, so that we may make arrangements beforehand for shipping your order in good time. No orders for Holland are accepted after 15th October 1950.

The figures in brackets represent the approximate heights as registered in our Nurseries.

Substitution. In the ordinary course of business we do not substitute, as is so often done, without the authority from Customers. Sometimes, however, it occurs late in the season that a particular variety is sold out, or that from failure of a crop, or some unforeseen cause, the exact instructions of the order cannot be carried out. We therefore beg our Clients to inform, if they object to substituting other varieties, if not we shall always use our best knowledge and ability to send good varieties, of equal merit, usefulness and value. If we do substitute, we wish it to be distinctly understood, that we shall always give the name of the variety sent.

Customers are invited to examine the goods on arrival and to check the contents of their consignment. Paper bags should be opened, so as to allow fresh air to the bulbs, and those wanted for forcing should be kept in a particular cool place, until wanted for potting.

All quotations are made out in U.S.-Dollars and without engagement. The execution of orders, even if accepted, is subject to accidents such as fire, strike, alterations in tariffs or governmental regulations.

Collective or group orders. We strongly recommend our Customers to join with Friends or Neighbors to make up a group order. Horticultural Societies, Garden Clubs, Institutes, Schools etc. are advised to pool their orders and take full advantage of the case lots we offer at much reduced rates. The different individual orders are all properly packed and labeled separately so that they can be easily distributed. The smaller boxes and parcels will be placed in one or more large cases and are shipped to the sender of the order.

DE JAGER Gold Medal Tulips

We make a great Speciality of Tulips

Tulips belong to the most beautiful of spring flowers and no plants are easier of culture than Tulips, as they are quite hardy, flowering freely in either sunny or shady situation. By a judicious selection of Single, Double, Darwin and Lateflowering Tulips, a most brilliant display of colors may be maintained for quite a long period in spring.

Outdoor planting. In beds or borders Tulips may be planted in the autumn until severe frosts set in, but October and the early part of November is the best time. Plant about 4 inches deep and 4 to 5 inches apart. They should never be planted in the same soil 2 years in succession, unless the soil is removed and replaced with fresh to a depth of 12 inches. Inattention to this matter is often the cause of failure with Tulips.

For Forcing. They want the same soil and treatment as Hyacinths (see our cultural directions for Hyacinths) but it is necessary to plant the bulbs in pots, pans, boxes etc. as soon as possible after arrival. If, for some reason, there must be a delay, the Bulbs should be stored in a cool place with a constant temperature. We advise our Customers to mention it when Bulbs are required for forcing.

Darwin Tulips

(May-flowering)

We confidently recommend this late-flowering section of self colored Tulips, with their stately bearing and rich colors. They deserve universal attention and are wonderfully valuable for bedding, borders etc. on account of their brilliant colors and their long upright stems.

They are excellent for cutting, just at the time that the spring flowers are over and there is scarcity of flowers in the open ground. The cut flowers are beautiful for decoration in vases and last a long time in water. By gentle forcing they may be had in flower from end of January and onwards. We have discarded a great many varieties, which we considered inferior to those offered now.

COLLECTIONS OF TALL GIANT DARWIN TULIPS

Our collections of Darwin Tulips are very popular and are giving entire satisfaction. Customers may rely upon getting a full range of colors in very fine and distinct varieties of good strong constitution and all flowering the same time. They produce a gorgeous and harmonious display in Tulip-time being the envy of all who can appreciate their loveliness. All Top-size bulbs.

Among others the following are included in our selection: **Afterglow**, apricot-orange, **Scarlet Beauty**, fiery-scarlet, **Golden Age**, bright golden-yellow, **Princess Elisabeth**, soft rose, **New Orleans**, velvet-glossy-purple etc.

All 10 varieties are separately bagged and labelled.

Breeder Tulips

(May-flowering)

These Tulips have gained prominence in the gardens of the real Amateurs, as they produce a most artistic effect by their refined flowers, produced on strong upright stems with color combinations, ranging from purple to bronze, orange, yellowish and buff, which colors are not be to found in the other Late-flowering Tulips, also on account of their enormous size and vigorous growth, sometimes the flowers are larger than Darwins.

COLLECTION OF BREEDER TULIPS

The exacting Gardener will want his or her bulbs to come direct from the actual grower for more than one reason. The assurance that bulbs receive expert storing, handling and packing. No hand touches the bulbs between the time they are packed on the bulb farm and the time the package is opened at the moment they are required for planting or potting. Bulbs should be handled as careful as eggs, if we may put it like that, please observe this and your attention and carefulness will be rewarded tenfold when you come to look for healthy and sturdy plants and blossoms in Winter or Springtime.

Cottage and Hybrid Tulips

(All May-flowering)

Cottage Tulips are so named because they have mostly been found in old Cottage Gardens of Great Britain and France, where they have been growing for a great number of years. They are distinct in habit, embrace many beautiful colors, and are excellent for borders, where they should be freely planted in large clumps or masses. They may also be naturalized in grass, wild Gardens, etc. where during the month of May they present a gorgeous display.

COLLECTION OF COTTAGE AND HYBRID TULIP

As in all collections of Bulbs offered in this catalogue, our collection of Cottage Tulips are made up very carefully, comprise a full range of colors and varieties of good merit only. Customers may rest assured to receive all Top-Size bulbs.

Triumph Tulips

Before the war we have been reproached for not featuring these Tulips more strongly and advertise more about their outstanding characteristics and merit. They are a new race of Tulips being a crossing between Single Early and Darwin Tulips and were raised by a Haarlem Nurseryman a good many years ago.

They are exceedingly valuable for the flower garden, in borders etc. on account of their strong stems, vigorous habit, wonderful colors. Triumph Tulips flower about 10 days later than Early Single T. thus bridging the gap between the early and late varieties nicely.

They will force all steadily and the substance of the flowers is superior.

COLLECTIONS OF TRIUMPH TULIPS

We offer a very interesting Collection of Triumph Tulips at a much reduced rate to encourage the cultivation of these good Tulips which deserve to be grown more extensively. We can strongly recommend our customers to try our Collection, which will give entire satisfaction. All furnish excellent material for beds, being particularly effective in masses of several colors.

Mendel Tulips

A race of Tulips, raised by crossing Duc van Tholl and Darwin Tulips. This new family owes its particular value to the fact that it has contracted the glorious colors of the Darwin Tulips, as well as their vigorous habit. They are of the earliness of the Duc van Tholl family and can therefore be forced very easily, thus adding to their value considerably.

Treatment for forcing. Plant before the end of September in boxes, pans or pots in any rich garden soil and plunge in the ground on a cool spot where the temperature does not rise to over 50 degrees. They can be brought into the Greenhouse at the dates given to each variety listed, they should, however, then have obtained a height of 2½ to 3 inches (do not bring indoors before). They may at once be exposed to the full light contrary to all other Tulips which should be started in the dark. If for some unforeseen reason this height is not obtained and the bulbs are found to be lazy, they should be left in the dark for a few days and thus encourage them to go up.

COLLECTIONS OF MENDEL TULIPS									
These collections of Mendel Tulips are made of such varieties that are particularly suitable for pot and bowl culture for flowering in the latter part of January. They are, of course, also suitable for planting outdoors.

Early Double Tulips

Double flowering Tulips are of fairly robust growth and have massive flowers, in many cases they are as large as small Peonies, and last somewhat longer than Single Tulips. The Double Tulips are not so elegantly formed as Single Tulips, nevertheless they are exceedingly useful and effective for bedding purposes. Most of the Double varieties are excellent forcers and they make fine displays when grown in pots, pans, boxes, etc., they should, however, be forced slowly.

COLLECTIONS OF EARLY DOUBLE TULIPS

We include in our collections of Early Double Tulips five beautiful different colored varieties of the same habit and height, which we can recommend with every confidence.

Kaufmanniana Hybrid Tulips

(Waterlily Tulips)

This is one of the most remarkable group of Hybrids of recent introduction from the beautiful Tulipa Kaufmanniana. They flower far ahead of other Tulips on short stems, they establish themselves easily, coming up freely year after year without any care. Most of them have mottled, striped, or spotted foliage like Greigii, which is a beautiful and interesting characteristic on its own. We very strongly recommend them for the rock-garden, border and other places where they can be left undisturbed.

Kaufmanniana (Waterlily Tulip), (Central Asia) (6), a charming species, producing in March large flowers of elegant form and remarkable beauty, opening out to a great size in the sun; color soft creamy-white, centre slightly marked with carmine-red, strongly recommended for planting in groups in borders and in Rock-gardens, they may be left undisturbed and will flower for many years.

\$ 1.10 per doz.; \$ 8.00 per 100

Alfred Cortot (8), an outstanding Hybrid on account of its striking color of glowing bright scarlet with a jet-black base and beautifully mottled leaves. Highly recommended at R.H.S. Wisley trials 1948, very rare.

Daffodils and Narcissi

The beauty of Daffodils and Narcissi is unquestioned and these flowers now form a leading feature in almost every spring garden. Every gardener should realize the enormous amount of intense pleasure that can so easily be obtained from the cultivation of a batch of Daffodils or Narcissi.

The indication of Daffodil and Narcissi. The terms „Daffodil” and „Narcissi” are interchangeable, but there is a tendency to apply the name „Daffodil” to the varieties of which the trumpet or cup is as large or larger than the perianth or segments, while the name „Narcissi” is used for the varieties having small cups. The name „Narcissi”, however, is correct for all the different types of Daffodils and Narcissi.

Soil and its Treatment. Daffodils and Narcissi will thrive in any well cultivated garden soil but prefer a good deep well drained loam. In preparing the ground for planting, dig deeply and if well rotted stable or cow manure is available this may advantageously be dug in 18 to 20 inches deep so as not to come into immediate contact with the bulbs. Never use fresh manure of any kind at planting time. On poor and dry sandy soils we recommend a dressing of sulphate of potash at a rate of about 1 oz. per square yard to be sprinkled over the surface of the ground after planting.

Naturalizing Daffodils and Narcissi in Grass etc. All Daffodils and Narcissi are suitable for naturalising but in very heavy soils preference should be given to stronger growing sorts i.e. Trumpet varieties and many Large Cupped sorts. They are all admirably adapted for grassy slopes and banks, where they should be freely planted. A splendid effect is obtained when Trumpet and other varieties are grouped separately.

Growing Daffodils and Narcissi in the Cold Greenhouse or Indoors. It is doubtful whether many people realize the amount of intense pleasure that is obtained from the cultivation of a few fine daffodils in a cold or very slightly heated greenhouse or in a sitting room. The flowers last well, often for two or three weeks and of course the earlier and later varieties provide a succession.

Revision of the Classification of Daffodils. In this catalog we have adopted the revised system for the new R.H.S. classification of Daffodils and Narcissi formally approved by the General Bulb Growers Society of Haarlem (Holland) and the Daffodil Societies of America, Canada, Australia, Tasmania and New Zealand.

The principal changes on comparing the old system with the new are as follows: The former Leedsii, Incomparabilis and Barrii Divisions are transferred into two Divisions, viz.: Division II Large-Cupped Narcissi with its sub-divisions a, b, c, d and Division II Small-Cupped Narcissi with its sub-divisions a, b, c, and d.

The whole Genus is now classified in eleven Divisions as follows:

- Ia. Yellow Trumpets.
- Ib. Bicolor Trumpets.
- Ic. White Trumpets.
- IIa. Large-Cupped, yellow perianth, colored cup or corona.
- IIb. Large-Cupped, white perianth, colored cup or corona.
- IIc. Large-Cupped, white perianth, white cup or corona.
- IIId. Large-Cupped, not falling in a, b, or c.
- IIIa. Small-Cupped, yellow perianth, colored cup or corona.
- IIIb. Small-Cupped, white perianth, colored cup or corona.
- IIIc. Small-Cupped, white perianth, white cup or corona.
- IIId. Small-Cupped, not falling in a, b, or c.
- IV. Double varieties.
- V. Triandrus Narcissi.
- VI. Cyclamineus Narcissi.
- VII. Jonquilla Narcissi.
- VIII. Tazetta Hybrids (Poetaz etc.).
- IX. Poeticus Narcissi.
- X. Species and Wild forms and Hybrids.
- XI. Miscellaneous Narcissi not falling into any of the foregoing Divisions.

New and Rare Daffodils

We offer the following list of very choice and rare Daffodils and Narcissi, which should be of special interest to the real Connoisseurs and Fanciers. The Bulbs offered are all top sized and orders should reach us as early as possible, not later than the 15th of September, after which date we replant our stock. The sooner these Bulbs are planted the better it is while this importance is of equal interest to Purchasers.

- Ardclinis** (White Trumpet 1c), this is one of the very finest White-Trumpets up to date, a large flower of most perfect form, balance, quality and fine carriage, broad smooth flat perianth and perfectly proportioned neatly flanged trumpet of clear white throughout of very durable substance and fine waxy texture. \$ 1.20 each
- Armada** (Large-Cupped 2a), F.C.C., R.H.S. 1947, an outstanding and magnificent novelty raised by Mr. Guy L. Wilson and caused a real sensation, a well poised 4½ in. diameter flower with smooth, broad much overlapping intense deep yellow perianth and deep tangerine red-orange cup-shaped crown, 1 in. long and about 1¾ in. in diameter at its frilled and expanded mouth. \$ 25.00 each

Cromarty (Yellow Trumpets 1a), A.M., R.H.S. 1938, this trumpet of faultless form and beautiful quality has broad smooth flat perianth standing at right angles to the neatly flanged and serrated trumpet which color is of a deep self gold; very free flowering and splendid sturdy habit, recommended for exhibition.

95 cts. each; 3 for \$ 2.75

Cushendall (Small cupped 3c), A.M., R.H.S. 1936, this is in our opinion the best green-eyed flower under cultivation; it is of faultless form and quality and splendid substance, broad smooth circular overlapping perianth of purest sparkling poeticus white, very shallow saucer crown edged with a delicious cream-colored frill, the whole centre is of a lovely moss-green.

\$ 3.00 each

Dunkeld (Large Cupped 2a), a magnificent well-formed flower having broad smooth circular clear yellow perianth of fine substance and shallow expanded vivid orange-scarlet crown; immensely vigorous, free of increase and free flowering, comes very good in the cold greenhouse.

\$ 1.25 each

Erie (Large Cupped 2a), this is a very charming variety of recent introduction, with broad deep golden yellow, stained orange perianth and a fairly large deep orange crown, very distinct on account of its deep coloring.

40 cts. each; 3 for \$ 1.00

Fermoy (Large Cupped 2b), a magnificent flower of great size and fine quality, with very large pure-white perianth and well proportioned beautifully frilled bowl-shaped crown, bright orange-red at the mouth shading to gold in the base, very vigorous plant.

\$ 9.75 each

Forest Fire (Large-Cupped 2a), this is a remarkably fine showy free-flowering red and yellow that is perhaps best described as a larger and better Porthilly with almost sunproof color on account of which it is a fine garden plant, it comes in first class form and color under cold glass, vigorous grower.

\$ 3.00 each

Galway (Large-Cupped 2a), A.M., R.H.S. 1942, this is magnificent tall strong-stemmed intense self golden flower, bordering on trumpet proportions, broad smooth perianth, well flanged trumpet crown; it is a glorious garden plant, owing to its splendid size, build, proportion, stature and color, also excellent for exhibition.

\$ 10.00 each

Golden Torch (Large-Cupped 2a), A.M., R.H.S. 1947, an exquisite rich golden flower of grand quality, perfect form and proportion, short necked and nicely posed on a tall strong stem, broad, smooth, flat clear rich golden-yellow perianth and well balanced frilled flanged crown of slightly deeper and more intense gold.

\$ 14.75 each

Grape Fruit (Yellow Trumpet 1a), F.C.C. Haarlem 1944, this is a handsome flower of great beauty and distinct coloring, large well-shaped trumpet with broad thick much overlapping perianth, color a pale lemon throughout, the whole flower slightly deepening to a very soft greenish lemon as it ages.

\$ 5.00 each

Green Island (Large-Cupped 2b), A.M., R.H.S. 1946, a sensational flower of very large size, great substance and waxen smooth texture. Smooth rounded white segments of such immense width that they form an almost complete circle. Well proportioned shallow bowl shaped frilled cup, greenish white at the base inside, passing to white, which in turn passes to a band of clear, cool, greenish lemon at margin. Short necked on a tall strong stem. Plant of great vigor.

\$ 15.75 each

Hardy (Small-Cupped 3b), a very unique and really attractive flower with flat smooth much overlapping creamy-white perianth of splendid quality and heavy durable texture, the orange-red crown is semi-double and heavily frilled.

\$ 2.25 each

Brunswick (Large-Cupped 2b), a very early variety, producing a very tall flower of perfect form, and is well poised on a tall strong graceful stem, it has beautiful modelled flat clean-cut white perianth of very firm texture, the perfectly balanced crown is just like a short nicely flanged and frilled trumpet, clear icy-white in the base and gradually shading up to sharp very green lemon at the brim.

60 cts. each; \$ 6.50 per doz.

Cantatrice (White Trumpet 1c), F.C.C., R.H.S. 1939, this variety has scored a remarkable triumph at the various flower shows all over the world. A flower of a most exquisite quality and smooth texture, clean-cut pointed even perianth standing out sharply from the well-balanced perfectly smooth rather slender trumpet, absolutely pure clear-white throughout, a perfect beauty.

\$ 4.00 each

- Carnlough** (Large-Cupped 2c), a distinct flower of strong sturdy habit, fine size and superb quality, broad firm flat pure white perianth; on first opening the crown is faintest citron with a frill of soft coral-pink; in time the entire flower passes to purest white throughout, exceptionally durable. **\$ 1.30 each**
- Chérie** (Jonquilla 7), a most unusual and charming hybrid, having an ivory-white perianth with a small cup, distinctly flushed pale shell-pink. From one to three smallish flowers on each stem, very exquisite. **\$ 1.60 each**
- Chinese White** (Small-Cupped 3c), A.M., R.H.S. and Haarlem 1948, this is a very large flower of quite faultless form and quality, pure-white throughout except for a point touch of green in the eye, perfectly proportioned shallow-fluted saucer crown, a superb show flower, quite unique, strong plant. **\$ 20.00 each**
- Chung King** (Small-Cupped 3a), A.M. Haarlem 1948, this is truly a gorgeous and magnificent Small-Cupped variety, a large tall stemmed very circular flower, having broad, smooth, clear yellow perianth and an intense deep vivid red shallow crown. **\$ 5.00 each**
- Content** (Bicolor Trumpet 1b), A.M., R.H.S. 1940, a very large and quite unique trumpet after the style of Beersheba, but larger and much taller, the noble perianth is built of broad long flat petals, of a fine smooth quality and substance. When first opening it is a uniform tone of lovely soft greenish primrose throughout, it then gradually passes to a very pale lemon-white all over, except the brim of the long graceful trumpet which retains a dainty frill of lemon, very vigorous grower. **\$ 3.70 each**
- Coverack Perfection** (Large-Cupped 2b), A.M., R.H.S. 1934, an unique flower of outstanding charm, broad overlapping rather painted perianth, large wide shallow saucer crown, edged and flushed pale gold and salmon and has a faint tinge of green behind the anthers, very tall and of great substance. **\$ 1.50 each**
- Cragford** (Poetaz 8), A.M. Haarlem and R.H.S., this new beautiful introduction has caused much sensation among the Dutch on account of its extreme earliness and its easy response to forcing, it has a strong pure white perianth, excellent form and a brilliant scarlet eye, it may be successfully grown in pebbles in water like Paper-white Narcissus to bloom just after Xmas. **60 cts. each; \$ 6.00 per doz.**
- Crocus**, F.C.C., R.H.S., A.M. Birmingham, a very striking flower, which might almost be classed as a Trumpet, broad perianth and well flanged trumpet of great substance and of most intense golden-yellow throughout. **70 cts. each; \$ 8.00 per doz.**
- Hollandia** (Double 4), A.M. Haarlem 1943, here is a very unusual type of a double Narcissus, it is classed as a double, but is only partly so, the flat overlapping and intermixed perianth is yellow and the large very double crown is deep sunproof orange-red, a most attractive and outstanding flower. **\$ 12.00 each**
- Hollywood** (Large-Cupped 2a), a novelty, this very fine and noble flower might best be described as an improved Fortune, large, much overlapping and flat deep-golden yellow perianth, the large trumpet shaped crown is clear orange, very early flowering and vigorous grower. **\$ 9.00 each**
- Kanchenjunga** (White Trumpet 1c), A.M., R.H.S. 1940, this is an immense flower with the biggest and broadest perianth segments yet seen, forming an almost perfect circle and a magnificent widely flanged and serrated trumpet, perianth pure white, trumpet palest lemon passing to white, a noble flower of stately carriage. **\$ 3.90 each**
- Kilworth** (Large-Cupped 2b), an outstanding variety, large flower with broadly overlapping white perianth and perfectly proportioned bowl-shaped crown of intense dark orange-red with a touch of dark green in the eye, sunproof, one of the best varieties in the red and white class, vigorous grower. **\$ 6.00 each**
- Kingscourt** (Yellow Trumpet 1a), F.C.C., R.H.S. 1947, an immense flower of faultless form, superb quality and uniform intense deep golden color, flat velvet smooth perianth of immense breadth and noble perfectly balanced bell-mouthed trumpet, strong stem, fine sturdy plant. **\$ 8.75 each**

- Ludlow** (Large-Cupped 2c), undoubtedly one of the finest varieties in this section yet raised, a perfect show flower of moderate size and faultless form having broad flat perianth of solid texture, which stands at right angles to the well-proportioned trumpet shaped crown, the flower is purest ice-white throughout, a very beautiful flower of perfect finish and graceful appearance. **\$ 5.25 each**
- Magherally** (Large-Cupped 2a), a smallish but tall stemmed flower of magnificent brilliant color, having golden perianth and neat almost ruby-red cup, a good laster, attracted considerable comment at the 1943 London Daffodil Show. **\$ 2.00 each**
- Magic Circle** (Large-Cupped 2b), A.M. Haarlem 1946, a novelty of great beauty, well overlapping and flat pure white perianth, the large and very flat golden-yellow crown is broadly margined bright scarlet, very distinct. **\$ 2.50 each**
- Makassar** (Daladier) (Large-Cupped 2a), very strong, much overlapping and thick perianth and a large spreading crown, the color of this very fine flower is deepest orange-gold throughout and is of noble form, highly recommended. **\$ 5.75 each**
- Mount Hood** (White Trumpet 1c), a novelty of great refinement, large pure white flowers with broad smooth perianth segments of great substance, and a long pale, creamy-white well proportioned trumpet nicely rolled back at mouth, tall grower, fine for pots. **50 cts. each; \$ 5.00 per doz.**
- Moville** (Large-Cupped 2c), A.M., R.H.S. and Haarlem, this is an exquisite and lasting flower of largest size and fine texture, on first opening the large widespread perianth is white, while the well-proportioned somewhat basin-shaped crown is primrose, but the whole flower soon passes to pure white throughout and at the same time keeps on growing to an enormous size. **\$ 5.75 each**
- Mulatto** (Yellow Trumpet 1a), A.M. Haarlem, a remarkable flower of unique and striking color, smooth flat perianth of sulphur yellow and a large expanded sulphur-colored trumpet, the inside of which shades to almost white with deep sulphur frilling at margin, vigorous grower. **45 cts. each; \$ 4.50 per doz.**
- Orange Bride** (Large-Cupped 2b), F.C.C., A.M., Haarlem, a beautiful and refined flower with flat overlapping pure white perianth, while the tangerine-orange crown is beautifully frilled, giving the flower a lovely appearance. **\$ 3.00 each**
- Preamble** (Bicolor Trumpets 1b), F.C.C. 1949, A.M., R.H.S. 1948, it is a first early, well contrasted clean bicolor of superb quality, opening with smooth, flat, pure white perianth and very rich bright chrome-yellow trumpet which has a neat little flange; as the flower ages the rich color of the trumpet fades out a little bit, becoming more lemon in tone but never goes white. Excellent exhibition variety. **\$ 12.00 each**
- Principal** (Yellow Trumpets 1a), F.C.C., R.H.S. 1937, this is one of the best yellow trumpets up to date, it has a perfectly balanced self yellow trumpet of great substance, quality and smooth texture. Very broad flat circular perianth; trumpet beautifully finished with an evenly flanged mouth, flower well posed on a tall strong stem. Grand show flower. **\$ 1.00 each; 3 for \$ 2.80**
- Ramillies** (Large-Cupped 2a), A.M. 1944, a noble flower of medium size, but of the very highest quality, much overlapping and flat clear golden-yellow perianth, the expanding crown is deep yellow with a distinctly marked ribbon edge of deep scarlet and has great lasting qualities. **\$ 1.25 each**
- Red Bird** (Large-Cupped 2b), F.C.C., A.M. Haarlem, a distinct and charming variety, broad much overlapping, snow-white perianth with a rich colored deep, orange-red cup; very showy. **\$ 1.00 each**
- Red Hackle** (Large-Cupped 2b), A.M., R.H.S. 1948, a really magnificent and most brilliant large red and white of splendid form and habit, broad rather pointed pure-white perianth, very slightly reflexing, frilled bowl-shaped crown of solid intense deep orange-red, holds color well, good stem and neck and free flowering. **\$ 4.75 each**
- Rouge** (Large-Cupped 2a), a strikingly novel and very distinct break in coloring, the widespread perianth is yellow overlaid pinkish buff, while the expanded cup is deep brilliant rather brick-red, it invariably elicits much admiration and comments at shows. It is early and free flowering. **\$ 1.75 each**
- Royal Crown** (18), a lovely flower, large sulphur-white perianth, the very large heavily fringed and spreading crown is soft apricot. **\$ 1.00 each**

Royal Mail (Large-Cupped 2a), a fine vigorous variety of recent introduction, broad smooth overlapping perianth of a rich golden-yellow, large vivid orange-red crown, frilled at mouth. **\$ 5.25 each**

Rustom Pasha (Large-Cupped 2a), a large striking flower of gorgeous color, wide spread pointed clear deep golden perianth, cup opens dull orange and deepens to vivid tangerine-scarlet, which is absolutely sunproof, one of the best red and yellow up to date varieties for growing in pots, a very fine novelty. **60 cts. each; \$ 6.25 per doz.**

Samite (White Trumpet 1c), F.C.C., R.H.S. 1940, here is another recent introduction of superlative quality, an exquisite self-ivory-white flower of most perfect form and balance and the very finest and smoothest thick velvety texture, tall vigorous plant. **\$ 1.20 each**

Spellbinder (Yellow Trumpet 1a), a large flower of the most wonderful and entirely distinct clear luminous, greeny sulphur-lemon. When fully developed the inside of the flanged trumpet passes almost to white, while the outside of the trumpet retains its color, and the serrated brim is tipped with sparkling lemon, most attractive. **\$ 18.00 each**

Sunnybrook (Large-Cupped 2b), A.M. Haarlem, this is one of the finest John Evelyn seedlings, white perianth with a large beautifully frilled cup of sun-proof soft orange, a superb variety for the garden. **\$ 1.70 each**

Swansdown (Double 4), P.C., R.H.S., 1940, this beautiful double variety is quite distinct from any other, large milk-white flower of great substance with very broad circular overlapping outer segments and a double centre of white feathery looking petals, very attractive. **\$ 12.00 each**

Trocadero (Bicolor Trumpet 1b), A.M. Haarlem, a superb white trumpet with a broad overlapping white perianth, standing squarely at right angles to the bold primrose trumpet, which is flanged and serrated, an imposing plant. **\$ 2.50 each**

Trousseau (Bicolor Trumpet 1b) F.C.C., R.H.S. 1947, here is an exquisite Bicolor Trumpet of superb quality, perfect form, great substance and fine satin-like texture, very broad smooth flat pure white perianth and well proportioned straight neatly flanged trumpet, which opens soft yellow and passes gradually to a most lively rich buff rosy-cream. **\$ 9.75 each**

Zero (Large-Cupped 2c), this is one of the finest White-Daffodils raised by Mr. Guy L. Wilson, it is a glorious flower measuring 5½ inches in diameter, very large broad flat widespread perianth, the beautiful vase-shaped crown has a slightly expanding bell-mouth, pure icy-white throughout with a lovely deep green perianth tube, tall strong stem and short necked. **\$ 9.75 each**

New Pink Daffodils

There is no official section of these colored Daffodils registered in the R.H.S. classification, but their beauty and popularity nowadays seems to ask that they are offered in a special group, to assist customers to make their selections. It should be remembered that most varieties of Pink Daffodils do not show their color until the flower is fully developed.

Champagne (2b), an interesting novelty of pure white overlapping perianth, with a large cup of pale-cream, broadly edged apricot-pink, turning salmon-pink as the flower develops. **\$ 6.00 each**

Menton (2b) (A.M. Haarlem) a fine variety, with large slightly fringed cup with pink flush on outside, deeper inside, edged orange and rose, when flower ages, it turns to almost clear pink. **\$ 3.00 each**

Mrs. R. O. Backhouse (2b) (The Pink Daffodil), this is one of the choicest that may be seen in the garden, a variety of quite unique coloring, large trumpet shaped crown of a full shell-pink shaded deep pink at brim, perianth ivory-white and slightly reflexed, long lasting, it should not be missed in any collection. **\$ 2.75 per doz.; \$ 20.00 per 100**

Pink Fancy (2b) (A.M. Haarlem), here is a splendid free flowering variety of very free increase, overlapping white perianth with apricot cup broadly margined soft pink, very valuable for cutting and for the garden. **\$ 6.25 per doz.; \$ 45.00 per 100**

Pink Glory (2b), a very handsome flower of great interest, with graceful overlapping pure white perianth, with an exquisite large crown of pale yellow, quickly turning a beautiful pink when fully developed, inside of crown deep apricot pink. **\$ 6.00 each**

Pink Rim (2b) (A.M., Haarlem), this variety has solid white well formed perianth, cup soft yellow with a distinct pink rim, a valuable introduction and good garden plant. **\$ 3.75 each**

Pink O'Dawn (1b), here is another novelty of fine quality, with pure white perianth of good breadth and substance, the trumpet of which is distinctly flushed shell-pink. **\$ 5.25 each**

Rosario (2b), this is the most charming flower of nearly trumpet character and measurements, having broad smooth purewhite perianth, the trumpet-shaped crown which is gracefully flanged and frilled is of very pale soft primrose shell-pink, in good seasons it comes almost entirely pink, good sturdy grower. **\$ 25.00 each**

Rose of Tralee (2b), this remarkable flower is of beautiful form and quality, having pure white perianth pointed at the tips, long nicely flanged crown of rosy apricot-pink right down to the base passing off white before the flower dies. **\$ 3.00 each**

Topic (2b), this is a really vigorous pinky crowned flower and a first rate garden plant, broad white perianth and large crown well flushed with pink, a valuable introduction. **\$ 2.00 each**

Toscanini (2b), a beautiful new variety of great distinction and noble form, broad pure white, much overlapping perianth of splendid substance, the ivory-white crown with a broad apricot-pink band gives the nicely proportioned flower a very distinguished appearance, a very fine garden and exhibition variety. **\$ 1.65 per doz.; \$ 18.00 per 100**

Wild Rose (2b) (P.C., 1946), this is a real advance in pink coloring as the cup is a quite definite rosy-pink to the base, the color being in the main retained the flower dies. It is the pinkest cup yet raised up to date, not a large flower but of pleasing form and balance, good doer, attractive novel and striking. **\$ 9.75 each**

Division VIII - Tazetta Narcissi

(Comprising the former Poetaz Narcissi (Bunch-flowered Group))

Distinguishing characters: Characteristics of any of the Narcissus Tazetta group clearly evident

A beautiful race of Narcissi, tall vigorous growers, the individual flowers, which are produced in a bunch, resemble those of a Poeticus and are delightfully perfumed. They were raised by crossing Poeticus Ornatus and Narcissi Polyanthus, the former being the seed parent. They are perfectly hardy and may be left undisturbed in the garden for years. We can also strongly recommend them for gently forcing.

Admiration (19), a beautiful showy variety with 4 to 6 flowers on a stem, perianth pale yellow, cup orange, heavily margined scarlet, profuse bloomer, ideal for forcing and a grand bedding variety. \$ 1.30 per doz.; \$ 9.50 per 100

Exhibition Hyacinths

(Top Size Bulbs)

The best handpicked quality, choice bulbs, selected from healthy stocks, adopted for Bowls, Pots, Glasses and for Exhibition. We include only valuable varieties in our Collections.

CULTURE IN POTS

Mix up a light rich compost of loam, leaf mould, well decayed cow manure and pure sand in equal portions, let this stand about one month before using. Hyacinths should be potted early in September for Christmas flowering and every fortnight after for succession.

In potting leave the top of the bulbs level with the surface of the soil, which should be moderately moist and be pressed firmly; place a little clean sand round the base of the bulb. When potted place on a bed of ashes and cover with cocoanut fibre refuse to a depth of about 5 inches; after three or four months, when well rooted, remove to the forcing house as required but care should always be taken that the bulbs are well rooted before beginning to force, as successful cultivation depends almost completely on this point. To keep the foliage dwarf and to assist the perfect coloring of the flowers, when growing, they should have occasionally a supply of liquid manure. Always use clean old pots or pans.

HYACINTHS IN GLASSES

Fill the glass with water (rainwater preferred) so as almost to touch the base of the bulbs a few pieces of charcoal should be put in the glass, as this is of service in keeping the water pure. The next proceeding is the simple one of placing the glasses in any dark room, cellar or cupboard, until the sprouts are about 3 inch. high then they may be brought gradually to the full light. We only recommend Single varieties for this purpose. Although this system of culture is very simple, it is of the first importance that suitable bulbs be obtained.

OUTDOOR CULTURE

For successful cultivation in the open air, Hyacinths may be planted any time from September to December, September and October being the best months; they like a light rich soil, the ground should be sufficiently drained to prevent it becoming too retentive of moisture; plant the bulbs at equal distances apart in circles or straight lines and about 5 inches deep. Never plant the bulbs when the ground is wet. They require a little covering of straw or a thin layer of leaves during the winter to protect them from frost.

Those marked * are easy forcing varieties and especially suitable for indoor culture.

Choice Large-Flowered Crocus

When planted two or three inches apart in squares, the many flowers each bulb produces, will thickly cover the whole plot. In lawns and pleasure parks, planted in grass, they are extremely effective. Also for forcing they are very fine, but they should be forced slowly in an airy situation. Crocuses should not be planted too deeply but only covered. We have discarded a great many varieties in favor of better ones.

COLLECTIONS OF CROCUS

 Something very outstanding to have in bloom in pots during winter is a collection of our choice large flowered Crocus. Plant thickly in pots immediately on receipt and plunge the pots in peat fibre or ashes. Crocuses cannot stand artificial heat and should be grown as cool as possible and given water freely when removed from the plunging bed. If the temperature is too high they will go blind. These collections can, of course, also be used for more liberal plantings in the garden.

WINTER-FLOWERING CROCUS SPECIES

There are no bulbs that give more pleasure in the garden as these Crocus-species and a rockery may be made more attractive, not only because of the greater variety, but also by reason of the succession of flowers produced by the various species. We strongly recommend them for a trial, if you are not already acquainted with them. They ought to be much more extensively cultivated on account of their unsurpassed decorative beauty. Plant 3 to 4 inches deep.
